B²

Moreover, as shown in Fig. 3, in a second embodiment, a single concave mirror 21a may be used instead of the two concave mirrors 20 and 21 of Fig. 1. The single concave mirror 21a condenses optical rays from the light source 1 and outputs to the diffraction grating 4, and further inputs the optical rays from the diffraction grating and ~~outputs~~ the optical rays to the output slit ~~page~~ plate 7a. Here, the input slit and the output slit are the same.
